

Centres Of Excellence

Essex Teaching School Alliances in developing the Centres of Excellence Blue prints. During this academic year the Teaching School Alliances (TSAs) involved in the project have focused on developing one centre of Excellence respectively. They have used current research and the excellent practise and expertise in Essex schools in order to develop each Centre of Excellence blue prints. The blueprint pilots have been tested by the TSAs and outstanding schools to ensure impact is demonstrable.

There was a very successful meeting on the 15th June where the Teaching School Alliances involved in the project shared their Centre of Excellence Blue prints with each other. There are now 13 high quality Centres of Excellence blueprints available each one has been specifically designed to focus on one area. For example, some focus on whole school approaches such as Assessment, Creative Curriculum, GROW and Success for All, whilst others are targeted at specific key stages such as Phonics, Early Years or Year 6/7Transition. There are also blueprints developed to support strengthening Governance, whilst others are developing Middle leaders, teachers and teaching Assistants. To find out more and contact details for the Centres of Excellence blue prints.
