

# The Britannica® Bundle

Britannica Digital Learning brings together a stack of educational resources that many schools and libraries would otherwise have to purchase individually. We offer this one-stop shop at a fraction of the cost of purchasing the services piece by piece. See how our subscribers save time and money below.

## Journals

No need for a journal subscription. We offer more than 800,000 journal articles from more than 750 journals.

A sub to a comparable database costs around £800 annually

## Cross-Curricular

Departments will save from their individual budgets, as our content spans a wide breadth of knowledge.

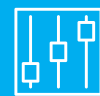

## Video & Imagery

Say goodbye to endless YouTube scrolling. We provide videos, rights-cleared images and multimedia.

A comparable subscription to a stock photo service costs £1,400+

## Adaptive Learning

Special Education Needs (SEN) students are supported in moving through education levels without the school having to hire personal tutors for lower capability students.

Hiring several tutors for a school can cost upwards of £1,000 per day

## E-Books

Access to thousands of e-books, including the complete works of William Shakespeare and Charles Dickens.

To purchase sets of paper books for an average year level costs £4,000+

## Translation

Instead of buying translated content, you can easily translate Britannica's content on the fly.

## Lesson Plans

Ready-made lesson plans help NQTs get to work without expensive additional training.

A pack of 100 lesson plans typically costs around £300

As a Britannica customer, you get all of this value for an annual fee of just **£599** for primary schools or **£995** for secondary schools.
